

High performance touch screen

With the "plus" series we are putting forward an entire series of professional touch screen monitors. Along with the standard versions with 15-inch displays, we also offer you larger models for every application: with a display size of 17 inches the GT-17plus offers you the perfect unit for high-end monitors with an integrated touch screen. Stylish design, robust and stable construction, as well as the combination of high-quality individual components guarantee you placement of professional touch screens in retail, production, the office, or at information terminals.
