

Accurately identify patients with Zebra thermal bar coded Z-Band® print solutions.

One simple solution. Countless patient-safety benefits.

Simple-to-operate Zebra thermal printers generate crisp, clear bar codes that scan reliably and accurately; they also print sharp text and graphics.

Genuine Zebra Z-Band wristbands and Zebra® thermal printers are designed to perform together as a complete, optimal bar code wristband print solution. Z-Band print solutions allow immediate access to critical patient information at the bedside—and across all hospital departments. As a result, your organization can ensure accurate and safer medication administration, specimen collection, lab sample and film tracking, and more. Implementing Z-Band print solutions as the cornerstone of your patient safety initiatives today will lay a solid foundation for your organization's complete point-of-care bar coding program tomorrow.

The advantages of thermal printing

Simple-to-operate Zebra thermal printers generate crisp, clear bar codes that scan reliably and accurately, and also print sharp text and graphics. They extend your bar coding investment by accommodating not only wristbands, but also a variety of labels for patient safety applications throughout the hospital. Zebra's desktop models are small enough to fit where you need them: on a cart, countertop or desktop. Plus, Zebra thermal print solutions integrate seamlessly into hospital information systems and are certified by leading HIT system providers.

Sharp, clean wristbands that last

Our direct thermal printing technology, combined with our specially coated wristbands, creates bar codes that hold up in hospital environments—with resistance to blood, foam washes and other liquids. As a result, they remain smudge-proof, scannable and accurate throughout a patient's stay.

In fact, laboratory testing demonstrates that Z-Band Direct wristbands with Zebra's patent-pending antimicrobial coating provide optimum image durability and scanning performance, and are not likely to cause skin irritation. Results also prove the antimicrobial coating protects Z-Band Direct and Z-Band QuickClip™ patient wristbands from *S. aureus*, *P. aeruginosa* and *E. coli* bacteria, the three leading causes of hospital infections in the United States. See the testing results in Zebra's white paper, *Laboratory Testing of Zebra Z-Band Direct Thermal Wristbands with Antimicrobial Coating*, at www.zebra.com/antilab.

Protect your Zebra printer investment

Preserve your printer's reliability and quality results with a cost-effective ZebraCare™ Extended Warranty and Maintenance Program. For more information, contact your Zebra authorized reseller or call Zebra's Inquiry Department at +1 800 423 0442.
